

**2014 DKT IMPACT**  
**CYPs/ Women of Reproductive Age/CPR/ DKT Share**  
**(excluding all abortion activities)**

A	B	C	D	E	F	G
PROGRAM	DKT CYPs	Adjusted CYPs <sub>1</sub>	Women of reproductive age <sub>2</sub>	Modern method contraceptive prevalence (CPR) <sub>3</sub>	CPR from DKT programs (C/D)	DKT share of all modern method users
Ghana	884,696	666,869	6,700,000	23.4	9.95	43%
Ethiopia	2,906,525	2,213,668	22,300,000	27.3	9.93	36%
Philippines	2,690,051	2,618,895	25,300,000	34.0	10.35	30%
DR Congo	412,628	252,178	15,500,000	5.4	1.63	30%
Indonesia	7,351,171	7,399,749	66,900,000	57.9	11.06	19%
Mozambique	129,357	83,224	5,900,000	11.3	1.41	12%
India (Bihar)	1,748,786	1,140,466	40,837,000	28.4	2.79	10%
Egypt	2,426,301	1,127,172	21,000,000	57.6	5.37	9%
Nigeria	871,927	244,250	39,200,000	10.5	0.62	6%
Vietnam	762,029	517,655	26,000,000	59.8	1.99	3%
Pakistan	841,804	324,690	47,300,000	26.0	0.69	3%
Brazil	1,129,075	1,103,929	54,900,000	77.1	2.01	3%
Mexico	583,490	343,987	34,000,000	66.5	1.01	2%
India (Mumbai) <sub>4</sub>	4,174,144	1,891,431	302,600,000	62.1	0.63	1%
Turkey	182,736	92,995	20,300,000	46.0	0.46	1%
Thailand	45,842	40,393	18,100,000	77.5	0.22	0%
China	1,017,166	419,603	372,400,000	84.0	0.11	0%
Tanzania	560	26	11,200,000	27.4	0.00	
<b>TOTAL</b>	<b>28,158,288</b>	<b>20,481,180</b>	<b>1,130,437,000</b>			

**NOTES**

**1.** Abortion is not included in the PRB (or DHS) enumeration and is thus eliminated here. We have also adjusted CYPs for IUDs and implants to reflect current users as well as users from prior years, including a reduction of impact to account for users who may have stopped the method **2.** The number of women of reproductive age is based on *all* women of reproductive age, not just those who are married/in a union (which is the denominator in determining CPR). PRB's Family Planning Worldwide Data Sheet (2013) is the source for WRA: [http://www.prb.org/pdf13/family-planning-2013-datasheet\\_eng.pdf](http://www.prb.org/pdf13/family-planning-2013-datasheet_eng.pdf) We've therefore underestimated DKT's impact (column G) by accounting for all women of reproductive age (column D) -- not just married women/ women in a union. **3.** All figures for column D and E are from PRB (2013) except India Bihar-IDHS (2008). **4.** DKT's program with headquarters in Mumbai is national in scope. We therefore determine WRA as all of India less Bihar (where a second program is based). The CPR of India/Mumbai comes from India Maharashtra- IDHS (2008).

*\*Percentages in parentheses represent the proportion of women using modern method contraception who were served by DKT in 2014.*
